<u>AFFIDAVIT OF LISA OSTELLA</u>

I, Lisa Ostella am over the age of eighteen (18) and am a Plaintiff in the within

action. I have personal knowledge of the facts herein and if called to do so, I could and

would competently testify under oath.

I declare:

1.   I have worked on computers for 24 years. I am familiar and comfortable

with basic programming, creating macros and working with DOS, Unix and

Windows based systems. I have run my own server as well as been a customer

for shared hosting. I would rank my knowledge base as an above average user

concerning computers as well as the Internet.

2.   Since I have only worked with the Law Offices of Philip J. Berg in a limited capacity from July 2009 to present, I am unfamiliar with much that occurred prior to that time.   Below, please find my opinions of the letter and attachments from Geoff Staples of Hostricity Web Hosting based on my observations of what is being presented.

3.   First, item of issue is his initial paragraph.   It appears to be redacted. ObamaCrimes is on one line with a large amount of space and the dot com is hard returned to the next line.   My opinion is that line was redacted and I base that thought on the fact that Hostricity ran and had full control of more than one domain of the Law Offices of Philip J. Berg.

4.   Gail Fry, obamaissues@yahoo.com, was in charge of setting up the GoDaddy account for the Law Offices of Philip J. Berg and transferred the domains from Hostricity to GoDaddy after Geoff Staples was fired.   I spoke with her October 3, 2010 to gather some more information I needed to be as accurate as possible in making my affidavit.   Ms. Fry told me that the Law Offices were unaware of all domains, except ObamaCrimes.com, when they were created by Geoff Staples.

5.   **Exhibit "A"** – Letter from Geoff Staples showing broken sentence in first paragraph.

6.   **Exhibit "B"** – GoDaddy invoice showing the transfer of: ObamaCrimes.com and ObamaCrimes.us.   Lisa Liberi's address is redacted by me (Lisa Liberi's address appears as Gail Fry put charges on Lisa Liberi's credit

card for services with Godaddy on behalf of Mr. Berg.) obamaissues@yahoo.com represents Gail Fry.

7.   **Exhibit "C" and "D"** – This is the 'whois' history of ObamaCrimes.us showing the site resided on Meganameservers, which is a Tucows service, which was used by Geoff Staples. Megamailservers, the mail service of Meganameserver, is shown in Geoff Staples own email header information as being a local host of Hostricity in his own attachments Staples provided to this Court.

8.   Next issue I have with Geoff Staple's letter is his statements that Lisa Liberi had involvement with the Linkpoint setup. Hostricity sells 'out of the box' websites for eCommerce already set up with LinkPoint by Geoff Staples. See **Exhibit "E"** showing websites **prescripted** by Hostricity. I also take issue with the donate page Geoff Staples used for ObamaCrimes, since it is still live on his server as of October 4, 2010, see **Exhibit "F"**. **This page should not still be on his server because the Law Offices have absolutely no control over who he is collecting funds from with this donate page**. This donate page was **not** scripted per the instructions provided by LinkPoint in the very email provided in the attachments to the Court by Geoff Staples. As per the email, see Geoff's own attachment as **Exhibit "G "**, this donate webpage should be directing to LinkPoint's secure host: secure.linkpt.net. Instead, LinkPoint is residing on its own host file at Hostricity as shown in **Exhibit "F"**. The donate data submits to securewebexchange.com which is under meganameservers.com, see **Exhibit "H"**. **Exhibit "C" and "D"** showing this server is used by Geoff Staples.

9.   As for Staples' attachments, I am not sure what they are representing. So I first took a look at what the Cerberus Helpdesk is since the attachments show Cerberus as the Helpdesk. Hostricity is a licensed user of Cerberus, **Exhibit "I"**, which is located in Brea, Orange County, CA. They provide their members with a forum for support with servers, domain management, and their products, **Exhibit "J"**. I could **not** find anyplace at that forum where emails were collected. This Cerberus is a forum for registered members for posting. See **Exhibit "K"** for format sample.

10.   Then I went to Hostricity's support chat. This also has the Cerberus logo; but it is online form submit and not something one would send email to, see **Exhibit "L"**. So again, I am at a loss as to what this collection of emails or messages are suppose to represent origin wise that Geoff Staples submitted.

11.   The first page of attachments is trying to depict that Lisa Liberi forwarded an email to helpdesk@hostricity.com. But the email is showing the headers and the headers do **not** show Lisa Liberi receiving this mail. The email headers show the email going from hostricity.com@megawebservers to geoffstaples@hostricity.com and it shows megawebservers as being a local host of Hostricity. See **Exhibit "M"** for the email headers and reference **Exhibit "C"** **and "D"** to show megawebservers was Geoff Staple's service from Tucows as shown in his previous domain hosts of ObamaCrimes.US as well as **Exhibit "H"** with his use of securewebexchange.com that was collecting donation data.

12.   The next email on Staple's attachments displaying header information again is being represented in these attachments as being forwarded from Lisa

Liberi. But again, the headers **don't** show them routing to her email. **Exhibit "N"**, Staples attachment, shows an email being forwarded from Lisa Liberi to helpdesk@hostricity.com. **The actual header shows it coming from hosticity.com@megawebservers and going to geoffstaples@hostricity.com. With, again Hostricity being the local host for megawebservers.**

13.   I welcome Geoff Staples to explain as to how donation information was being collected by his server, sent to his email directly, needed to be forwarded to his own email by another party?

I declare under the penalty of Perjury of the laws of the United States that the foregoing is true and correct. Executed this 4 day of October 2010.

_____
LISA OSTELLA, Plaintiff

State of New Jersey   )
                                          §
County of Morris   )

On this 4th day of October, in the year 2010, before me Madeleine R Vasquez
                                                                                             Notary Public Name

a notary public, personally appeared Lisa Ostella, and proved on the basis of satisfactory evidence to be the person whose name is subscribed to this instrument, and acknowledged he executed the same. Witness my hand and official seal.

Re: Your Faxed Request	Date: September 24, 2010

Ms. Taitz:

Per your faxed request for information regarding Lisa Liberi's access to credit card accounts while I was web host for Phil berg and the obamacrimes
.com website:

I have attached emails from our archive showing that Lisa Liberi had access to donors credit card information, that she was processing credit cards, and that she was involved in the setup of the Linkpoint merchant account.

In order to process credit cards, she had to log in to the Linkpoint virtual terminal.

Please note that the credit cards listed in these emails have now expired, so I did not remove them.

EasyStoreMaker Pro

Built-in to Hostricity's WebSiteOS and included with all Silver Lite and above service plans

A First-Class Shopping Cart for Online Businesses
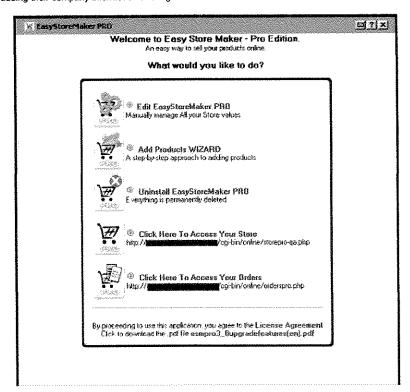

End User Benefits

- Opportunity to establish a position in the emerging ecommerce marketplace

- Ability to create a full-featured online storefront to promote and sell products 24/7

- Support of online credit card processing and interact payments

The Internet has revolutionized the concept of doing business by eliminating geographic and time-related barriers between merchants and consumers. Having a storefront on the Web allows businesses to offer their products to anyone, anywhere at anytime.

Hostricity EasyStoreMaker Pro offers a powerful ecommerce solution for small businesses. From setting up a storefront, to managing inventory and customer data, this wizard-driven management application is designed for small business users of any technical level.

Setting Up A Store

The EasyStoreMaker Pro install wizard features a step-by-step guide to creating a new store including setting financial information, customizing messages and disclaimers, and setting storefront preferences. Users choose from a suite of professionally designed storefront templates, adding their company information and logo.

Order Processing and Management

EasyStoreMaker Pro supports a variety of payment gateways for interact and credit card order processing. A bundled generic SSL certificate enables the store to securely process credit card transactions while the *View My Orders* feature allows store managers to view pending online orders and reconcile payments with their accounting programs.

Store Management

A full-featured administrative backend provides easy product and customer data management. The

Add Products Wizard allows users to easily setup individual products, and a CSV import/export feature enables users to upload multiple products and easily manage inventory.

Features:

Easy Store Set-up	A step-by-step install wizard allows users to set their store specifics including tax and currency settings, shipping information and more
Storefront Templates	Allows users to create a turnkey professional-looking storefront without design knowledge.
Payment Gateway Support	Supports a variety of payment gateways for fast online credit card processing.
Bundled SSL Certificate	Free generic SSL certificate ensures online orders and credit card transactions are secure.
Product Import/Export	CSV import/export function allows users to easily manage their inventory and upload multiple products.
Product Showcasing	Built-in feature product section allows users to showcase new or sale items on their storefront.

Templates

Choose the look of your store from over 40 professionally designed templates which are free for use by Hostricity customers..

Payment Gateways

Listed below are the most popular payment gateways and whether or not they are supported by ESM Pro. (Note: If you need more flexibility in credit card processing, consider one of Hostricity's other offerings: Easy OSCommerce, ProStores, or Miva (contact us for Miva).

Cerb5 On-Site (Single Seat License)
CODE: CERB5-ADDSEAT

Price : $100.00

Company Name:

Serial # (if adding seats):

I purchased Cerb4:   ☐ (-50%)

ADD TO CART

This is a single seat (simultaneous worker) license for **Cerberus Helpdesk 5.x** (Cerb5) which unlocks all functionality and plugins. You can add additional seats to this license now or in the future as you need them.

All Cerb5 licenses provide unlimited worker accounts. If upgrading from Cerb4, consider how many seats (simultaneous workers) you need instead.

You may use the Cerb4 upgrade discount *once* per serial number.

Your first license will receive 90 days of product updates as a warranty. Future updates are available at a flat rate of $250 which provides an additional 90 days of coverage. Purchasing updates is entirely optional, and there's no contract or penalty for updating less often.

To add multiple seat licenses, increase the quantity of this item in your shopping cart.

If you have an existing paid serial number you'd like upgraded, please provide it. Otherwise you may leave the field blank to create a new license.

Visit the product website

* Don't let your budget stop you from taking control of your team's inbox. Discounts -- including free licenses with higher worker limits -- are available for educational institutions, registered charities, established open source projects, and cash-strapped small companies.

Cerb5 On-Site (Product Updates)
CODE: CERB5-UPDATES

Price : $250.00

Company Name:

Paid Serial #:

Term+Discount: +3 months

ADD TO CART

Your first license will receive 90 days of product updates as a warranty. Future updates are available at a flat rate of $250 which provides an additional 90 days of coverage. Purchasing updates is entirely optional, and there's no contract or penalty for updating less often.

📝 **Cron not working Centos5**

Hi can somene help me getting the cron job working to retrieve the incoming emails? I'm using Centos5 and would like it to poll my account every 5 minutes.

I'm using Centos5
PHP 5.2.6
Cerb4

Thanks, I have seen this & tried but it's not working, but this works directly from shell:-

wget -O - http://my.domain/cerb/index.php/cron

no problems with that, but as a cron job it runs ok but does nothing doesn't poll my email account.

Try this

---

curl -s http://installationdomainname.com/cerb4/cron 2>&1

Notes (read them all because they are not in any logical order):

1. If you have url rewrite turned on, be sure that the url you use works with the way your url rewrite is setup.

2. You can test this by trying the url in your browser to make sure it works before you put it in your cron.

3. We have our own Centos5 / Cpanel servers. This works in that environment.

4. Be sure to put the ACTUAL ip address in the **Cerberus** setup. Using 127.0.0.1 did NOT work.

5. Be sure you have your cron set to send results to an email address you can monitor. The above will only email errors.

6. If you are not receiving email and you are not getting log files written to the root of your website (same level as public_html, not in public_html), try intentionally introducing an error in your cron to make sure you are getting error reporting.

7. If you are receiving the error messages, you will get accurate errors such as "404 page not found" if your url is wrong.

8. If you do NOT have the correct ip in the **Cerberus** settings, you will get an error response that specifies the ip address you need to add.

9. The ip address required to make the cron url work in your browser is the ip of your local computer, not the ip of the **Cerberus** installation on your server.

Hope this is helpful. Please feel free to contact me if you have questions.

Geoff

[solved]

Thanks for the info Geoff, although i didn't use it 😊
After changing my.domain.com to localhost it seems to work ok.
